HYDRAULISCH TRILBLOK  
HYDRAULIC VIBRATORY HAMMER  
Model 216

**Specifications:**

|                                   |                  |
|-----------------------------------|------------------|
| Eccentric moment                  | : 11,5 kgm       |
| Max. centrifugal force            | : 325 kN         |
| Frequency                         | : 800 - 1600 rpm |
| Max. amplitude incl. clamp        | : 15,5 mm        |
| Hydraulic power                   | : 95/129 kW/HP   |
| Pile clamping force               | : 450 kN         |
| Line pull for extraction          | : 270 kN         |
| Max. oil flow                     | : 380 l/min      |
| Max. pressure                     | : 170 bar        |
| Total weight with clamp and hoses | : 2350 kg        |
