上海秦路实业有限公司是中国知名的破碎筛分设备供应商。我们为客户提供全系列破碎筛分设备，包括高效复合圆锥破碎机，颚式破碎机，反击式破碎机，立轴冲击式破碎机，振动筛和成套碎石及制砂生产线。本公司已顺利通过 ISO9001:2008 国际质量管理体系认证和欧盟 CE 认证。

我们不仅为客户提供高性价比的产品，还提供一流的服务支持及解决方案。公司配备先进的 Solidworks 三维机械设计系统，培养了一支专业的技术与服务队伍，在全国各地设有办事机构，在不断扩大国内市场占有率的同时，我们的产品也已经出口到俄罗斯、哈萨克斯坦、越南、老挝、泰国、菲律宾、马来西亚、印尼、古巴、多米尼加、巴西、委内瑞拉、哥伦比亚、秘鲁、智利、沙特、约旦、利比亚、赞比亚、刚果等多个国家和地区，因其优良的品质、实用的功能，适中的价格为国内外广大客户所接受。

我们坚持不断地创新，持续改进产品，不断提高产品的可靠性，我们深知成功取决于客户的信赖，立志成为破碎筛分行业的世界品牌。

SHANGHAI KINGLINK INDUSTRY CO., LTD is a renowned crushing and screening machinery equipment provider in China. We provide our clients with a whole series of crushing and screening machinery equipment, including hydraulic cone crusher, jaw crusher, impact crusher, vertical shaft impact crusher, vibrating screen and all complete set of stone crushing and sand making production lines. Our company successfully achieved ISO9001:2008 Quality Management Certificate and EU CE certificate.

Kinglink is able to offer products with high performance as well as quality service support and solutions to our customers home and abroad. We have cultivated a professional engineering team equipping with advanced mechanical design system and one efficient after-sales service team who can respond customers' concerns quickly.

Kinglink has already established the sales and service network at more than 30 provinces in China. As well, we have exported our equipment and plant to different countries and regions around the globe, including USA, Russia, Norway, Vietnam, Laos, Malaysia, Philippine, Peru, Brazil, Columbia, Libya, Zambia, Congo, South Africa, Saudi Arabia and Chile etc. Our products are well recognized by worldwide customers for our quality goods, competitive price and quick responding service.

We stick to innovation, constantly improve our product quality and reliability and strive to become a world renowned brand in the industry of crushing and screening machinery. We understand that our success relies on our clients' confidence.

轧臼壁、破碎壁和上室 CONCAVE / MANTLE AND UPPER CHAMBER

偏心座 ECCENTRIC SEATING

铜套 COPPER SLEEVE

球面铜座 BOWL LINER AND SEAT

止推板 THRUST PLATE

传动轴与轴承 TRANSMISSION SHAFT & BEARINGS

高强度、坚固的机架 HIGH STRENGTH AND FIRM FRAME

圆锥破本体为箱形铸钢件整体结构，在重载部位高应力点设有加强筋。

The main body of the cone crusher a box shaped cast steel structure, whose high load areas are reinforced by hard steel.

有限元（FEM）分析和 FARO 测量 FEM & FARO MEASUREMENT

KL 圆锥破是利用 solidworks 技术进行设计的，且所有型号都经有限元技术分析，使机器达到最佳应力，以确保 KL 圆锥破具有高强度的结构。装配采用 FARO 三维测量，保证了高精度的装配，提升了设备稳定性。

KL cone crusher is designed by solidworks technology, and all models are analyzed by finite element technology to make the machine reach the best stress, so as to ensure that KL cone crusher has high strength structure. Faro three-dimensional measurement is used to ensure high-precision assembly and improve the stability of the equipment.

高可靠性和实用性源于精细的设计 HIGH RELIABILITY AND PRACTICABILITY ORIGINATES FROM EXCELLENT DESIGN

KL 圆锥破水平传动轴两端用圆锥滚子轴承替代了老式圆锥破的水平轴铜套，转速大幅提高。锥体蕊和球面座之间放置防尘圈，迷宫式密封圈中充满润滑油，防尘圈由放置在球面座内的弹簧浮起，有效防止粉尘侵入。采用电动自动润滑系统，润滑系统也跟主马达相互连结，若压力不足或温度过高时，主机马达会立即停止，以保护主机不受损坏。

KL cone crusher adopts tapered roller bearing to replace the old style horizontal shaft copper sleeve at both ends of the horizontal drive shaft and thus largely improves its rotation speed. Dust proof ring is assembled between the mantle core and the seat liner. The maze O-ring is full of lubrication oil. The dust proof ring is supported by the spring in the seat liner so as to prevent dust from entering. The machine adopts electric automatic lubrication system that connects the main motor. If the pressure is insufficient or the temperature is too high, the main motor stops immediately to prevent the main machine from damage.

KL 系列高效复合圆锥破碎机 根据用户需求制造

高产量、齿板磨损低易更换 HIGH CAPACITY, LOW COST AND EASY MAINTENANCE

该机具有良好的破碎腔形，增加了有效破碎面，主轴摆动次数大幅提高确定了新一代圆锥破碎机比老式圆锥破增加了 1/3 的产量，还有利于获得细粒级和均匀立方体产品。全部用数控立柱车床加工出的锥体蕊和破碎壁紧密结合，更换齿板时快速简单，不需要填充环氧树脂，大大节约了维修时间，减少了工人劳动强度。层压破碎原理以及优化设计的破碎壁、轧臼壁使用寿命大大提高。传统的圆锥破腔型，进料口小，破碎面有限，产量低，针片状产品含量高。锥体蕊和破碎壁之间需填充环氧树脂，不易更换，故障率高，加大了停机时间，运行不可靠。

Our machine's fine crushing chamber shape increases the effective crushing surface. The machine has the capacity to process larger feed size, increases 1/3 production capacity comparing with other cone crushers and can produce fine particles and cubic products. The mantle cone and the crushing chamber are processed by digital control CNC machine, which makes the replacement of wearing plates quick and easy, eliminates the need to fill epoxide resin and improves the operational efficiency.

Traditional cone crusher with the ancient crushing chamber structure, has limited crushing surfaces, low production and produces more elongated and flaky particles content. Epoxide resin needs to be filled between the mantle cone the crushing surface, which makes the replacement difficult, increases the failure rate and machine halt time and causes unstable performance of the machine.

液压清腔及过铁释放机构 HYDRAULIC CLEAR CAVITY

液压清腔是 KL 系列高效复合圆锥破碎机的标准配置，由放置在本体底板上的一组清腔油缸完成。推荐清腔油缸距离为 75mm，全自动结构采用的一组清腔油缸同时也作用于过铁释放保护。

Hydraulic pressure cylinder device can achieves iron release and quick chamber clearing by its some hydraulic cylinders. The recommended jacking distance is no more than 75 mm.

液压调整机构 HYDRAULIC ADJUSTMENT OF MECHANISM

本机 包含液压调整机构，便于快速调整破碎机排料口大小，还可以迅速清理破碎腔，大大减少停机时间。

The machine is installed with hydraulic pressure adjustment device so as to quickly adjust the discharge gap and clear the crushing chamber and therefore reduce the time of machine halt.
